SUMMARY

Flutter developer with 1+ year of professional experience delivering production-grade mobile applications. Proficient in Clean Architecture and MVVM patterns with hands-on expertise in BLoC/Cubit and Provider state management. Experienced in end-to-end deployment across Android and iOS, building reusable component libraries, and maintaining live apps with consistent cross-device performance.

EXPERIENCE

Associate Mobile App Developer

Feb 2025 – Present

4xp Tech by 4xPortal

- Architected and built a CRM application from scratch using Clean Architecture + MVVM, enforcing strict separation of presentation, domain, and data layers for long-term scalability.
- Delivered 20+ screens including multi-tab navigation and multi-step transactional flows (Deposit / Withdraw), with scalable state management via BLoC/Cubit.
- Engineered a reusable widget library and custom theming system, applying performance-focused practices such as const constructors and optimized widget tree separation to reduce rebuild overhead.
- Built a modular Swap Calculator feature using Provider, with clean separation of business logic from UI.
- Maintained a live cross-platform app (App Store & Play Store) using React Native, including a major SDK upgrade from 0.72.xx to 0.80.1.
- Independently managed Android and iOS release pipelines, resolving release-mode inconsistencies and cross-device performance regressions.

Flutter Developer (Intern)

Nov 2024 – Feb 2025

4xpTech by 4xPortal

- Contributed to Flutter app development and implemented UI components and features.
- Learned advanced Flutter concepts independently** and applied them in live projects.
- Assisted in debugging, API integration, and preparing apps for deployment.

PROJECTS

Finova | *Flutter, Firebase, Drift (SQLite), Provider, Clean Architecture*

- * Built a cross-platform mobile banking app with secure authentication and modern UI using Flutter
- * Implemented offline-first functionality using local SQLite (Drift) with background sync to cloud
- * Integrated Firebase Authentication and Cloud Firestore for secure user and transaction data management
- * Used Provider for state management to maintain clean separation between UI and business logic
- * Followed Clean Architecture to structure scalable, maintainable, and testable codebase

EDUCATION

Superior University

BS Computer Science

Gold Campus

Nov 2019 – Dec 2023

Govt. College of Science

FSc. Pre-Engineering

Wahdat Road, LHR

2017 – 2019

TECHNICAL SKILLS

Primary Framework: Flutter / Dart

Architecture & Patterns: Clean Architecture, MVVM, BLoC/Cubit, Provider

Mobile Deployment: Android (Play Store), iOS (App Store), release signing & optimization

Other Technologies: React Native, Firebase, OneSignal, REST APIs **Languages:** Dart, JavaScript, SQL, HTML/CSS

Tools: Git, Android Studio, VS Code / Cursor, Visual Studio
